### SUMMARY

UI/UX Designer with 6+ years of experience creating intuitive web and mobile products from concept to launch. Over the years, I've designed 20+ applications across SaaS, enterprise, and consumer products, working closely with product managers and developers to solve real user problems. I enjoy simplifying complex workflows, building scalable design systems, and creating experiences that are both visually refined and easy to use.

### EXPERIENCE

**Galaxy Weblinks LTD, Indore**

UI/UX Designer

(March 2020 - March 2026)

- Led the end-to-end design of 20+ web and mobile applications, taking projects from discovery and wireframes to high-fidelity UI, prototyping, and developer handoff.
- Partnered with clients, product managers, and engineering teams to transform business goals into intuitive user experiences that balanced usability with technical feasibility.
- Converted product briefs into wireframes, user flows, and high-fidelity prototypes in Figma, Sketch, and Adobe XD, reducing stakeholder revision rounds from 5 to 2, compressing feedback cycles before development began and cutting mid-sprint design change requests significantly.
- Redesigned legacy product interfaces to meet WCAG accessibility standards and responsive design requirements, eliminating critical usability gaps on mobile and tablet viewports with redesigns consistently receiving stronger client and stakeholder satisfaction at review.
- Created and maintained a reusable design system with 60+ components, enabling faster design iterations and more consistent user experiences across multiple products.
- Produced clear developer documentation and design specifications, resulting in smoother implementation and fewer UI inconsistencies during development.
- Mentored junior designers through regular design critiques, feedback sessions, and collaborative reviews, helping improve design quality across the team.

### EDUCATION

UX/UI, & Web Design Diploma course from Silica Institute, Indore (2018-2020)

Bachelor of Commerce from D.A.V.V. University, Indore (M.P) (2021-2023)

(Completed alongside full-time employment at Galaxy Weblinks)

### KEY ACHIEVEMENTS

- Designed UX and UI for 20+ digital products across web and mobile platforms.
- Built a reusable 60+ component design system adopted across multiple client projects.
- Cut stakeholder review cycles from 5 rounds to 2 by validating designs early with interactive prototypes.

### CORE SKILLS

#### UX & Research:

Human-Centered Design, User Research & Usability Testing, Information Architecture, User Flows & Journey Mapping, Heuristic Evaluation, Competitive Analysis

#### UI & Visual Design:

Interaction Design, Visual Hierarchy, Responsive & Adaptive Design, Mobile-First UI, Accessibility Standards (WCAG)

#### Product & Systems

**Thinking:** End-to-End Product Design, Design Systems, Wireframing & High-Fidelity Prototyping, Agile & Sprint-Based Workflows, Scalable Component Libraries

#### Collaboration & Delivery

Developer Handoff, Cross-Functional Team Collaboration, Design Documentation

### TOOLS

Figma

Sketch

Framer

Adobe XD

Photoshop

Canva

Notion

Zeplin

Stitch

Illustrator

Miro

Adobe Express

### WORKING STYLE

- Feedback-driven
- Detail-obsessed
- Research-informed
- Systems thinker
